EVOLUTION

INTERNATIONAL JOURNAL OF ORGANIC EVOLUTION

PUBLISHED BY

THE SOCIETY FOR THE STUDY OF EVOLUTION

Vol. 57 **Subject Index** **2003**

Evolution, 57(12), 2003, pp. 2920–2924

ADAPTATION

Acid tolerance, amphibians, environmental stress, haldanes, local adaptation, 352

Adaptation, adaptive hypopus dimorphism, astigmatic mites, evolutionary trends, genotype-by-environment interaction, hypopus induction, 828

Adaptation, canalization, epigenetic inheritance, eRF3, genetic assimilation, population genetics, sup35, 1498

Adaptation, ecological divergence, *Helianthus*, hybridization, natural selection, speciation, transgressive segregation, 1989

Adaptation, evolutionary rates, Fisher's geometrical model, modularity, pleiotropy, 1723

Adaptation, genetic background, life-history traits, microevolution, natural selection, QTLs, 2531

Amplified fragment-length polymorphisms, *Erythranthe*, external transcribed spacer, hummingbird-pollination, internal transcribed spacer, *Mimulus*, 1397

Antipredator behavior, damselfly, evolutionary loss, foraging, predator-prey interactions, trade-off, 574

Apostematism, body size, coloration, Dendrobatidae, evolution, phylogeny, signaling, 2904

Brassicaceae, family-diagnostic trait, floral morphology, pollen removal, *Raphanus raphanistrum*, selection gradients, stasis, 480

Bufo calamita, common garden, geographic variation, local adaptation, salinity, stress, transplant experiments, 1889

Burst speed, common garden experiment, Melanotaeniidae, morphology, natural selection, red muscle, U_{crit}, 104

Colony size, microsatellite, policing, *Polistes chinensis antennalis*, production schedule, sex allocation ratio, worker reproduction, 2365

Comparative analysis, phylogenetically structured environmental variation, phylogenetic correction, phylogenetic niche conservatism, variation partitioning, 2647

Drosophila melanogaster, environmental heterogeneity, genetic variation, genotype-environment interactions, laboratory adaptation, 1822

Foraging, generalism, islands, morphology, niche, *Zosterops*, 2147

ADAPTIVE RADIATION

Adaptive radiation, Caribbean, diversification rates, marine fish, mitochondrial DNA, 1584

Cone, diet, folivory, foraging, frugivory, opsin, retina, 2636

Diversification, Hookeriales, Hypnales, lineages through time, phylogenetic diversity, radiation, 2226

Ecological theory of adaptive radiation, feeding performance, fitness surface, *Loxia curvirostra*, morphological evolution, natural selection, stabilizing selection, 1176

BEHAVIOR

Animal communication, mate recognition, perception, *Physalaemus pustulosus*, sexual selection, 2608

Calling song, direct benefits, female preference, field cricket, *Gryllus lineaticeps*, male ejaculate, sperm, 2054

Coevolution, frozen mate-attraction, gynogenesis, *Poecilia formosa*, sexual selection, 1387

Drosophila hydei, *Drosophila melanogaster*, *Drosophila pseudoobscura*, female choice, male choice, mate preferences, parental investment theory, sex roles, 2037

Female behavior, inbreeding, microsatellite, paternity analysis, pinniped, polygyny, 1917

Hybridization, interbreeding, premating isolation, sexual imprinting, speciation, 2407

BIOGEOGRAPHY

Andean phylogeography, bryophyte biogeography, chloroplast DNA, Gondwanan vicariance, long-distance dispersal, New Zealand, *Pyrrhobryum mnioides*, 205

Biogeography, conservation genetics, Indonesia, phylogeography, vicariance, 1436

Biologically available energy, biome, molecular evolution, productivity, tropics, 2893

Ecological speciation, elevational gradient, mate preference, mate signal, Pieridae, wing melanization, 1100

Microsatellites, philopatry, phylogeny, population genetics, Southeast Asia, 1931

BOOK REVIEWS

Accounting for biological diversity, a review of *The Ecology of Adaptive Radiation*, by Douglas J. Futuyma, 1216

Evolutionary biology on the world wide web, a review of web sites for researchers in evolutionary biology, by Richard H. Ree, 438

Making sense of the evolution of human behavior, a review of *Sense and Nonsense: Evolutionary Perspectives on Human Behaviour*, by Marlene Zuk, 1451

Parasites at center stage, a review of *Immunology and Evolution of Infectious Disease* and *Adaptive Dynamics of Infectious Diseases: In Pursuit of Virulence Management*, by J. J. Bull and Dieter Ebert, 441

The science of religion, a review of *Darwin's Cathedral: Evolution, Religion, and the Nature of Society*, by H. Allen Orr, 200

CHROMOSOMAL EVOLUTION

Allozymes, *Drosophila*, inversion polymorphism, seasonal gametic disequilibrium, 839

Chromosome evolution, clines, hybrid zone, mitochondrial DNA introgression, population cytogenetics, weta, 849

Chromosome polymorphism, clinal variation, *Drosophila subobscura*, introduced species, rate of evolution, 1837

Colinearity conservation, comparative mapping, gene rearrangement, genome evolution, *HIS-C*, *repleta* group, 1325

COALESCENT THEORY

Coalescence, gene tree, labeled histories, population divergence, speciation, Yule model, 1465

Coalescence theory, linked selection, mitochondrial DNA, monophyly, species identification, three-times rule, 182

COEVOLUTION

Case mortality, clearance, fecundity, immunological up-regulation, infection, pathogen, 671

Coadapted gene complex, coevolution, mitochondrial DNA, oxidative phosphorylation, 2315

Coevolution, *Depressaria pastinacella*, furanocoumarin, geo-

COEVOLUTION

Case mortality, clearance, fecundity, immunological up-regulation, infection, pathogen, 671

Coadapted gene complex, coevolution, mitochondrial DNA, oxidative phosphorylation, 2315

Coevolution, *Depressaria pastinacella*, furanocoumarin, geo-

© 2003 The Society for the Study of Evolution. All rights reserved.

graphic mosaic, *Heracleum lanatum, Pastinaca sativa,* plant/herbivore interactions, 806
Columbidae, cospeciation, host, macroevolution, parasite, Phthiraptera, specificity, 2335
Competition, character displacement, natural selection, frequency dependent selection, divergent selection, speciation, adaptive radiation, stickleback, 1142
Daphnia magna, host-parasite coevolution, multiple enemies, resistance, specificity, trade-off, 784
Demographic compensation, geographic, local adaptation, predator, prey, range evolution, 746

COMPETITION
Competition success, conjugation, formae speciales, mating success, mating type, smut fungus, 766

DEVELOPMENT
Allometry, heterochrony, homology, human encephalization, sequential hypermorphosis, 2459
ANITA grade, developmental evolution, heterotopy, module, Nymphaeaceae, ontogenetic sequence, 216
Evolution of development, fertilization, gamete recognition, sea urchin, 2293
Geographic range, larval development, macroevolution, nonplanktotrophy, phylogeny, planktotrophy, stratigraphic range, 1031
Growth, mechanico-chemical models, pigment pattern formation, reaction-diffusion models, zebrafish, 1863

EPISTASIS
Additive genetic variance, epistasis, inbreeding coefficient, multiple loci, population bottlenecks, 706
Canalization, environmental robustness, epistasis, evolvability, genetic robustness, 1959
Coadapted gene complexes, cytomchrome *c* oxidase, environment interactions, epistasis, hybrid breakdown, intergenomic coadaptation, reproductive incompatibility, 2286
Convergent evolution, epistasis, experimental evolution, hybrid breakdown, multiple adaptive peaks, outbreeding depression, uniform selection, 274

EVOLUTIONARY GENOMICS
Active pollination, coadaptation, comparative analysis, figs, parametric bootstrap, phylogeny, 1255
Acute infections, evolution of virulence, microparasites, specific immunity, trade-off, within-host models, 1489
Adaptability, canalization, fluctuating selection, pleiotropy, robustness, 1448
Adaptation, *Bacillus,* bacterial ecology, fitness, selection, soil, spatial ecology, spatial heterogeneity, 27
Adaptive radiation, *Anolis,* comparative analysis, diversification, morphometrics, 2383
Adaptive shift, aridification, climate relict, molecular clock, phylogeny, 2819
Additive genetic variance, clines, evolution, life history, nonadditive genetic variance, 1846
Altruism, kin selection, levels of selection, social evolution, symbiosis, 693
Ancestor states, maximum likelihood, bacteria, base composition, Brownian motion, GC content, sequence evolution, 1783
Angiosperms, diversity, evolutionary rates, likelihood, taxon pairs, 460
Aphid transmission, *Cucumber mosaic virus,* cucumoviruses, satellite RNA, virulence, 755
Apical meristem damage, *Arabidopsis thaliana,* herbivory, overcompensation, resistance, tolerance, 1270
Carpodacus mexicanus, egg-laying order, growth, incubation, maternal effects, sex ratio, 384
Caudata, evolution, mitochondrial DNA, *Salamandra,* Salamandridae, viviparity, 129
Cheating, feather structure, honest signaling, natural selection, ornamental tails, runaway, sexual selection, 397
Comparative methods, constraints, functional morphology, Palinuridae, phylogeny, predation, sound production, 2082
Confidence of paternity, paternal care, paternity, *Phyllomorpha laciniata,* sperm competition, sperm mixing, 1078
Cytoplasmic male sterility, hybridization, introgression, marker incongruence, reallocation, 1776
Developmental constraint, differentiation rate, proliferation rate, trade-off, 939
Fitness, longevity, recombination, sex, synergistic, 1698
Mustelids, phylogenetic comparative methods, 1952

EXTINCTION
Araneae, Cenomanian-Turonian, fossil, mass extinctions, Mesozoic, 2599

FITNESS
Caenorhabditis elegans, compensatory mutation, fitness, life-history characters, mutation accumulation, mutation load, natural selection, 1022
Deleterious mutations, finite population, fitness, partial dominance, time to extinction, 2644

GENE FLOW
Bush rat, dispersal, gene flow, genetic structure, microsatellite, *Rattus fuscipes,* spatial autocorrelation, 1182
Chromatic polymorphism, *Ctenomys rionegrensis,* gene flow, microsatellites, phylogeography, range expansion, tuco-tuco, 913
Gene flow, inbreeding, inbreeding coefficient, isolation by distance, neighborhood size, population structure, Wright's *F*-statistics, 995

GENETIC DRIFT
Between-sex genetic correlation, ejaculate, fecundity, male effects, *Stator limbatus,* 1359
Bufo calamita, fitness, genetic load, inbreeding, wild amphibian populations, 177

GENETIC VARIATION
Additive genetic variance, Braconidae, half-sib analysis, heritability, sex ratio, 2659
Allozymes, *Camellia japonica,* spatial and temporal genetic structure, spatial autocorrelation, Theaceae, 62
Achroia grisella, cross-environmental genetic correlation, insect communication, Lepidoptera, Pyralidae, 1304
Body size cline, cell number, cell size, colonization, *Drosophila subobscura,* 566
Coral reef fishes, demographic history, genetic diversity, Holocene sea-level changes, life-history trait, mitochondrial DNA, 1571
Correlated selection, common principal component analysis, evolutionary constraint, eye span, genetic correlation, independent contrasts, Mantel test, 87
Diffusion approximation, distribution of mutational effects, genetic variation, mutation, rare allele, 1761
Dioecy, **G** matrix, genetic variance, gynodioecy, pollen, sex allocation, trade-off, 2012
Expression of additive genetic variance-covariance matrix, floral morphology, **G** matrix, heritability, *Raphanus raphanistrum,* wild radish, 487
F_{ST}, genealogy, genetic diversity, infinite-sites model, population differentiation, 949
F_{ST}, genetic architecture, life-history characters, microsatellite loci, morphology, Q_{ST}, R_{ST}, 2277

HERBIVORY
Ampithoe longimana, cytochrome oxidase I, *Dictyota,* heritability, phylogeography, plant-herbivore interaction, ribosomal internal transcribed spacer, 2262
Contextual analysis, group selection, herbivory, pollination, selection gradient, 509
Fitness, herbivore damage, herbivore tolerance, herbivory, plant tolerance, resistance, simulated herbivory, 677

HERITABILITY
Additive genetic variance, *Aegithalos caudatus,* animal model, cooperative breeding, long-tailed tit, nestling provisioning, parental investment, 2191

Hybridization

Africanized honeybee, *Apis mellifera scutellata,* fluctuating asymmetry, hybrid inferiority, negative heterosis, 2350

Allele sequence divergence, aphids, evolution of sex, hybridization, parthenogenesis, *Rhopalosiphum padi,* 1291

Allozymes, birds, Haldane's rule, hybridization, microsatellites, mitochondrial DNA, speciation, 2865

Backcross, expected heterozygosity, fitness, Galápagos, hybridization, inbreeding, 2911

Caste determination, genomic imprinting, hybridization, social hybridogenesis, *Solenopsis geminata, Solenopsis xyloni,* 1562

Dispersal, hybridization, hybrid zone, larvae, *Mytilus,* selection, 1061

Endogenous selection, exogenous selection, hybrid zone, *Poecile atricapilla, Poecile carolinensis,* transplant experiment, 630

Gene flow, habitat preference, linkage disequilibrium, migration, selection, speciation, 1876

Inbreeding

Artificial selection, dominance, genetic variance, heritability, inbreeding depression, 558

Arrhenotoky, genetic load, haplodiploid, inbreeding depression, local mate competition theory, mating system evolution, parasitoid, 1793

Clonal competition, inbreeding depression, metapopulation, Microsporidia, parasites, resistance, 777

Conservation, fitness, Gibbs sampling, MCMC, selfing, 1947

F-statistics, inbreeding depression, kin recognition, mate choice, sex-biased dispersal, 638

Fitness, heterosis, heterozygosity, mean d^2, outbreeding, 971

Fluctuating asymmetry, *Gryllus firmus,* inbreeding depression, limb length, morphological variation, 597

Founder-flush, genotype-by-environment interactions, novel environment, purging, 1314

Introgression

Ancestral state reconstruction, correlated character evolution, habitat specialization, independent contrasts, maximum-likelihood, niche shift, phylogenetic uncertainty, 1343

Autosomes, introgression, lineage sorting, *Macaca,* mtDNA, sex-biased dispersal, Y chromosome, 1419

Life cycles, *Magicicada,* paleoclimates, paleoecology, periodical cicadas, prime numbers, 428

Life-History Evolution

Adaptation, enzymes, intermediary metabolism, life history, trade-off, wing polymorphism, 586

AICc, capture mark recapture, complex life cycles, life history, manipulated phenotype, metamorphosis, survival, 872

Alternative strategy, environmental effects, fitness, juvenile growth, Salmonidae, 1133

Arachnids, body size, *Centruroides vittatus,* life-history theory, reproductive allocation, reproductive investment, 2184

Body size evolution, *Drosophila melanogaster,* experimental evolution, larval resource processing, thermal evolution, 1829

Cost of growth, growth trade-off, *Menidia menidia, Pomatomus saltatrix,* risk sensitive foraging, size-dependent mortality, 2119

Ecological selection, gender dimorphism, life-history strategies, local adaptation, sexual systems, 1973

Macroevolution

Australia, biogeography, Cape flora, molecular clock, nonparametric rate smoothing, radiation, Restionaceae, 2688

Comparative methods, MacroCAIC, macroevolution, phylogeny, sister-clade comparisons, species richness, validity, 18

Ectotherm, island community, island-mainland, macroecology, optimal body size, snake, 345

Extinction, macroevolution, maximum likelihood, speciation, species richness, 2469

Maternal Effect

Acid tolerance, amphibians, environmental stress, genetic adaptation, maternal effects, 363

Mating System

Aquilegia canadensis, genetic structure, inbreeding, mating systems, plants, self-fertilization, 1513

Cryptic female choice, maternal effects, multiple mating, polyandry, *Scathophaga, Scatophaga,* sexual conflict, 297

Diptera, evolution, *Sepsis cynipsea,* sexual conflict, sexual selection, 2765

Division of labor, evolution of polyandry, model, parasites, polyandry, social insects, 2067

Floral evolution, gynodioecy, *Lycium,* male-sterility, phylogeny, sensitivity analysis, sexual dimorphism, Solanaceae, 74

Gastropoda, habitat quality, inbreeding depression, mating system, microsatellites, parasitism, selfing, 2303

Models/Simulations

Adaptive dynamics, disruptive selection, evolutionary branching, resource partitioning, stable fitness minima, sympatric speciation, 2433

Artificial neural network, cognition, cryptic prey coloration, predation, search image, 1248

Bayesian inference, comparative method, independent contrasts, Markov chain Monte Carlo, multivariate normal, 1237

Conservation biology, deleterious mutations, genetic drift, mating system, purging, 2678

Crickets, *Gryllodes sigillatus,* ideal lottery, sperm competition, sperm displacement, spermatophore, 173

Molecular Evolution

Adaptive polymorphism, balancing selection, major histocompatibility complex, neutral theory, nonsynonymous substitution, 1707

Extrapair paternity, generation time, germline, male mutation bias, mutation rate, sex chromosomes, sexual selection, 2398

Gossypium gossypioides, hybridization, introgression, phylogenetic incongruence, speciation, 2475

Mutations

Arabidopsis, mutation, mutation accumulation, mutational effects distribution, statistical inference, 683

Arabidopsis thaliana, cross-environment correlation, genotype by environment interaction, mutation accumulation, nutrient, 984

Crossing experiment, fixed drift load, genetic drift, inbreeding load, purging selection, small populations, 2242

Parasitism

Allantonematidae, coevolution, *Drosophila,* host-parasite interactions, host range, *Howardula,* phylogeny, 544

Anopheles stephensi, evolution of virulence, malaria, *Plasmodium chabaudi,* vectors, 2792

Asexual populations, clonal competition, *Daphnia magna,* experimental evolution, microsporidia, parasites, 249

Avian malaria, coevolution, *Haemoproteus,* host-parasite interactions, Lesser Antilles, passerines, *Plasmodium,* 606

Borrelia burgdorferi sensu lato, coevolution, *Fratercula arctica,* gene flow, host-parasite interactions, *Ixodes uriae, Rissa tridactyla,* 288

Coevolution, host-parasite interactions, insect-parasitic nematodes, parasite-induced mortality, parasite-induced sterility, 1543

Micronucleus, *Paramecium,* phenotypic plasticity, trade-off, within-host growth, 1535

Parthenogenesis

Allozymes, hybridization, mtDNA, Scincidae, triploidy, unisexual vertebrate, 2619

Antioxidants, Chernobyl, condition dependenee, *Hirundo rustica,* mate choice, mutation, sexual selection, 2139

Phenotypic Plasticity

Allometric shape, *Drosophila simulans,* geometric morphometrics, growth temperature, nonallometric shape, phenotypic plasticity, stress, 2773

Amphipods, *Coitocaecum parvum,* phenotypic plasticity, progenesis, transmission modes, trematode, 2899

Baldwin effect, evolutionary theory, genetic assimilation, macroevolution, phenotypic plasticity, 1455

Barnacle, environmental heterogeneity, genotype-by-environment interaction, phenotypic plasticity, suspension feeding, wave-swept, 1281
Endemic plant species, environmental stress, genetic variation, phenotypic plasticity, population size, reaction norm, 496

PHYLOGENETICS
Adaptation, behavior, body size, branch lengths, comparative method, constraint, physiology, 717
Anemophily, diversity, flowering time, phenological spread, phylogenetically independent contrasts, pollination syndrome, 2001
Bacula, Bayesian phylogeny, hybrid zone, introgression, multivariate morphometrics, nested clade analysis, 1900
Bergmann's rule, body size, ectotherms, geographic variation, meta-analysis, reptiles, 1151
Biological species, genealogical concordance, hybridization, phylogenetic species, reinforcement, reproductive success, species concepts, 2721
Biosystematics, *Coreocarpus*, hybridization, molecular phylogenetics, phylogenetic incongruence, 52
Body weight, food classification, lactation, large intestine, mixed-feeding period, stomach, weaning period, 1196

PHYLOGEOGRAPHY
AFLPs, dispersal, islands, *Phylica*, Rhamnaceae, 816
Allelic richness, Caesalpinioideae, chloroplast DNA, climatic changes, cytonuclear disequilibrium, Leguminosae, microsatellite loci, tropical rainforest, 2753
Ancestral population size, coalescent, DNA substitution rate, geminate species, phylogeography, 2216
Appalachian, disjunct, migration, mitochondrial DNA, phylogeography, 372
Baja California, comparative phylogeography, control region, disjunct populations, Gulf of California, marine fishes, 1599
Battus philenor, geographic variation, mimicry, phylogeography, pipevine swallowtail, plant-insect interactions, range expansion, 1089
Benguela, cytochrome oxidase I, Eastern Pacific Barrier, gene flow, Isthmus of Panama, sea urchins, speciation, 2026
Cambaridae, crayfish, genetic variation, linear habitats, nested clade analysis, phylogeography, 2101
Caribou, glacial and interglacial refugia, mitochondrial DNA, phylogeography, population expansion, *Rangifer tarandus*, recolonization, reindeer, 658
Colonization, fragmentation, glaciation, haplotype tree, population structure, suture zones, 1631
Control region, genealogical species, mitochondrial gene tree, North American phylogeography, polytypic species, 119
DNA sequence variation, *Drosophila dunni* subgroup, island endemism, phylogeography, speciation, 2566

PHYSIOLOGY
Biological clocks, circadian rhythms, evolutionary physiology, geographical variation, photoperiodism, seasonality, 2342
Endothermy, heritability, mammals, metabolic rate, *Phyllotis*, thermal conductance, 1679

PLANT-INSECT INTERACTION
Allocation trade-offs, cost of resistance, *Datura wrightii*, demographic analysis, herbivory, resistance polymorphism, trichomes, 793
Biogeography, Fabaceae, host-plant specificity, insect-plant interactions, island colonization, island radiation, Psylloidea, 2540
Bumblebee, floral evolution, hummingbird, *Penstemon*, pollen removal and deposition, pollination, pollinator shifts, 2742
Coevolution, cospeciation, Gracillariidae, host shift, host specificity, insect-plant relationships, *Phyllonorycter*, 1804
Diversification, ecological speciation, host-plant specialization, host race, *Mordellistena convicta*, 168

PLEIOTROPY
Antagonistic pleiotropy, correlations, fitness characters, laboratory evolution, longevity, stress resistance selection, 527
Antagonistic pleiotropy, evolutionary trajectories, genetic correlations, laboratory evolution, long-term selection, longevity, stress resistance, 536
Fabaceae, fruit abortion, inbreeding depression, microsatellites, *Platypodium elegans*, viability selection, 518
Fitness, gametophytic selection, gynodioecy, negative pleiotropy, nuclear restorers, seed size, 231

POLYMORPHISM
Association mapping, balancing selection, genealogy, Lepidoptera, mimicry, sex-linked inheritance, 305

POPULATION BIOLOGY
Body size ratios, character displacement, convergence, *Etheostoma* spp., resource partitioning, stream fishes, 2374

POPULATION GENETICS
Adaptation, albumin, allozymes, coalescent, Lewontin-Krakauer test, mice, neutral theory, population structure, 2628
Amplified fragment length polymorphism, analysis of molecular variance, gene diversity, house finch, phylogeography, 2852
Colonization, *Drosophila simulans*, natural populations, Tirant, transposable elements, 159

POPULATION STRUCTURE
Ants, dispersal, *Formica*, genetic structure, inbreeding, monogyny, social insects, 1552
Breeding structure, gene flow, microsatellites, mitochondrial DNA sequence data, social organization, 2805
Deceit pollination, gene flow, introgression, microsatellites, Orchidaceae, pollination, sympatric populations, 2252
Genetic diversity, glaciation, landscape genetics, microsatellites, population structure, *Salvelinus*, spatial heterogeneity, 328

PREDATION
Armor, fitness, fluctuating asymmetry, functional morphology, selection, 2128
Body size, *Chaoborus*, fish predation, migration, predator avoidance, 2173

QUANTITATIVE GENETICS
Avian brood parasitism, cuckoo, discrimination, evolutionary lag, mimicry, quantitative genetic model, 1164
Body size, chromosome inversion, genetic differentiation, latitudinal cline, natural selection, quantitative trait loci, 2653
Breeders' equation, geometric morphometrics, heritability, quantitative genetics, selection, shape, size, 191
Common principal components, covariance matrix, genetic constraints, genetic correlation, genetic variance, heritability, line of least resistance, 1107
Correlated response, cuticular hydrocarbons, genetic correlation, mutual mate choice, sex lineage, 2326
Genetic correlation, genetic covariance, genetic variance, pleiotropy, response to selection, quantitative genetics, 1747

REPRODUCTIVE ISOLATION
Biological species, genealogical concordance, hybridization, lineage sorting, phylogenetic species, species concepts, species recognition, 2703
Breeding phenology, condition dependence, fitness, male-male competition, migration, territory quality, 862
Ecological isolation, hybridization, *Mimulus*, pollen competition, pollinator isolation, reproductive isolation, speciation, 1520
Fitness, promiscuity, reproduction, sexual antagonism, sexual coevolution, sexual mutualism, 1223

REPRODUCTIVE STRATEGIES
Dichogamy, geitonogamy, inflorescence size, interference avoidance, male reproductive success, pollen discounting, protandry, 240

SELECTION-ARTIFICIAL
Artificial selection, body mass, correlated characters, food consumption, ontogeny, wheel running, 646
Artificial selection, fecundity, genetic trade-off, offspring size, reproductive effort, *Stator limbatus*, 1121
Competition, evolution of chemical defense, fitness costs, iridoid glycosides, nutrient stress, *Plantago lanceolata*, selection lines, 2519

Constraint, coupling, development time, life history, two-trait selection, wing pattern, 1852

Selection-Experimental
Body size, desiccation resistance, latitudinal clines, natural selection, thermal evolution, 932

Selection-Group/Kin
Adaptive dynamics, altruism, kin competition, kin selection, mobility, relatedness, spatial heterogeneity, 1

Selection-Natural
Allometry, display traits, evolution, exaggerated traits, morphology, sexual selection, signaling, weapons, 2450
Animal model, genetic variance, long-term study, microevolution, natural population, phenotypic variance, 406
Antibody responsiveness, condition-dependence, cost of defense, ELISA, immunocompetence, ecological immunology, 1670
Ants, colony fitness, *Pogonomyrmex*, reproductive allocation, selection, 2179
Birth date, birth weight, *Cervus elaphus*, elasticity, elastogram, selection gradient, 2879
Directional selection, growth rate, litter size, maternal selection, parturition date, selection gradients, 1689
Disruptive selection, nonlinear selection, polymorphism, projection pursuit regression, quadratic response surface, selection analysis, sexual selection, 1622
Evolutionary rates, heritability, life-history traits, lifetime fitness, selection, *Tamiasciurus hudsonicus*, 2416

Selection-Sexual
Artificial insemination, clutch size, good genes, ornament, sexual selection, 2157
Behavior, behavioral genetics, good genes, life histories, male size, sexual selection, spiders, 1367
Body size, comparative method, fecundity, phylogeny, sexual selection, 1653
Competition, Piophilidae, *Prochyliza xanthostoma*, sexual conflict, sexual dimorphism, sexual selection, shape, 2046

Senescence
Aging, division of labor, life span, *Platythyrea*, thelytokous ant, 2424
Antagonistic pleiotropy, evolution, extrinsic hazard, interactions, senescence, 1478
Comparative method, mating patterns, molecular phylogenetics, paternal care, sex-role reversal, sexual selection, Syngnathidae, 1374

Sex Ratio
Adaptive dynamics, canalization, evolutionary branching, sex determination, threshold trait, 2667
Ants, kin selection, polygyny, queen-worker conflict, split sex ratio, 1336
Cost, ESS, intrauterine effects, sex allocation, sex ratio, viviparity, 927

Signaling/Courtship
Bioacoustics, consistency index, cytochrome *b*, phylogenetic signal, *Regulus*, territorial song, 616
Bird song, bursa of Fabricius, phytohemagglutinin, repertoire size, T-cell mediated immune response, 905
Carotenoids, cross-fostering, food provisioning behavior, great tit, nestling plumage coloration, *Parus major*, signaling, 144
Genotype-by-environment interaction, "good genes," *Hyla versicolor*, maternal half-sibships, metamorphosis, sexual selection, tadpoles, 883

Speciation
Accessory gland proteins, assortative mating, incipient species, sympatric speciation, 2785
Adaptation, ancient, bdelloid, diversity, genealogy, rotifers, speciation, 2166
Advertisement-call structure, call perches, female choice, preference function, preference strength, reinforcement, reproductive character displacement, 894
Agent-based model, assortative mating, homogamy, reproductive character displacement, speciation, 962
Allele, allopatry, incompatibility, parapatry, speciation, 151
Allochronic speciation, *Magicicada*, phenotypic plasticity, reproductive isolation, 433
Allopatric, mathematical, models, parapatric, speciation, sympatric, theory, 2197
Altruism, competition, diversification, reproductive isolation, selfishness, social behavior, speciation, 154
Amplified fragment length polymorphism, â-tubulin, *Bromus*, fungi, grass endophytes, host specificity, sympatric speciation, tef1-α, 37
Assortative mating, divergent selection, founder event, novel environment, reproductive isolation, speciation, 2557
Assortative mating, ecological speciation, host races, host shift, *Macrocentrus cingulum*, sex linkage, sympatric speciation, 261
Backcross, fecundity, hybrid fitness, postmating barriers, sex ratio, 2835
Bindin, positive selection, reinforcement, reproductive character displacement, sea urchins, speciation, 1049
Biogeography, extinction, *Halenia*, key innovation, nectar spur, preadaption, speciation, 2507
Cape flora, climate change, Ehrharteae, speciation, succulent karoo, 1008
Centrarchidae, *Micropterus*, mitochondrial DNA, molecular clock, phylogeny, speciation, 1610
Chromosomal changes, divergence, parapatry, postzygotic isolation, speciation, 447
Columbidae, divergence, Haldane's rule, inviability, speciation, 1411
Ecological speciation, habitat isolation, host race, hypergeometric phenotypic model, pea aphids, phytophagous insects, 1735
Environmental variation, hybridization, mate choice, reinforcement, *Spea*, speciation, 2842
Etheostoma, hybrid inviability, postmating isolation, premating isolation, reproductive isolation, sexual isolation, sexual selection, speciation, 317
Genomic conflict, hybrid female sterility, hybrid lethality, hybrid male sterility, meiotic drive, sex ratio, speciation, 2580
Hybridization, introgression, mating system, *Mimulus*, nucleotide diversity, speciation, 2490

Symbiosis
Cytoplasmic incompatibility, haplodiploid, hymenoptera, selection level, symbiosis, *Wolbachia*, 421

Trade-Offs
Crithidia bombi, encapsulation, insect immunity, trade-offs, trypanosomes, 1444
